WORK EXPERIENCE

Front-End Developer, ActiveLAMP

August 2013 - Present

- Project lead for large non-profit client
- Maintained and updated multiple client projects within Drupal
- Performed tasks in a scrum/agile manner working within a team to complete tasks in a given sprint
- Used Git and CI services to manage projects, code reviews and deployments
- Used project management tools such as JIRA/Confluence to manage projects, track progress and keep documentation
- Used MySQL to collect data and migrate content from one environment to another, writing scripts to handle this process as well as running SQL statements directly on local databases
- Set up and used SCSS Lint to keep our SCSS within recommended and set guidelines
- Worked with remote workers to complete tasks on the project and made sure that all items get accomplished
- Used XDebug to step through processes to debug specific functionality of the site
- Wrote visual regression test cases using Shoov.io using Javascript, GraphicsMagick, and WebdriverCSS
- Wrote blog posts for company site and created a video tutorial for company Youtube
- Helped write and code review our QA's tests using SauceLabs Sausage
- Experience with large cloud-based hosting platforms such as Acquia, Pantheon, Heroku, Platform.sh, and Amazon Services
- Learned Drupal 8 Development practices including Twig, Drush, and Drupal Console

Freelance Developer, Saavedra Designs

December 2011 - January 2016

- Developed Wordpress websites focusing on modularity and client usability

- Worked closely with the designer to develop websites based on comps
- Communicated standup reports for segments of work to clients
